

ISO 46001 Requirements - International

Your partner
in progress

Course descriptive

This course outlines the requirements of ISO 46001:2019 water efficiency management systems, aiming to help and enable organizations to assess and account for their water use, and to identify, plan and implement measures to achieve water savings through the systematic management of water.

Our one-day requirements course uses an activity-based, delegate-centered approach. This helps you share water management experiences and knowledge with other attendees, bringing the information presented alive to improve retention and support your implementation process when you return to work.

Pedagogical objectives

This course will help you:

- Understand and explain the importance and benefits of having an effective Water Efficiency Management System in place
- Develop and implement a water efficiency management system that allows your organization to continually improve how it uses water
- Manage water consumption and efficiency for your organization
- Understand how water efficiency performance is a key element of an organization's performance and the benefits of integrating your water efficiency management system with your organization's overall strategy
- Motivate your colleagues as well as engage their commitment and cooperation as you implement and maintain the system
- Inform your senior management team of the requirements of the standard, help them decide on next steps and provide guidance on implementation decisions and auditing requirements
- Recognize the important role that water efficiency management systems have in accelerating responses to risks associated with climate change
- Support your organization in recognizing corporate social responsibility, sustainability and governance initiatives as well as protect its brand and reputation

Skills to be acquired

Upon completion of this training, you will be able to explain:

- What is a water efficiency management system
- Why a water efficiency management system is important to an organization and its benefits
- The background of ISO 46001:2019 and its intended outcomes
- The terms and definitions used
- The key concepts and structure of ISO 46001:2019
- The main requirements of ISO 46001:2019

Targeted audience

Anyone involved in the planning, implementing, maintaining, supervising or auditing of an ISO 46001 Water Efficiency Management System.

Prerequisites

There are no formal prerequisites; however, it will be useful for delegates to read the International Standard before attending this course.

Duration

1 day – 7 hours

Pedagogical, technical and framing means

Course materials including :

- Introduction to the training, detailed program and security assignments
- Course presentation, theory and activities/ role plays
- Answers to the activities
- Videos
- Additional documents, distributed during the sessions, to use for the activities
- Attendance sheet to be signed

Assessment specifics

- Questionnaire to assess the knowledge at the end of the training
- Customer survey

What is included?

- Course materials, provided electronically
- Letter of attestation
- Official certificate

Agenda

Day 1

Time	Topic
09:00	Welcome and introductions
	Course objectives and structure
	ISO 46001 Water efficiency management systems awareness
	Module 1: History, key terms, and principles
	Module 2: Key concepts, processes and structure
	Module 3: Clauses 4 and 5
	Module 4: Clause 6
	Module 5: Clauses 7 and 8
	Module 6: Clauses 9 and 10
	Module 7: Reflection and summary
17:30	Close of day

*These training modules are eligible to the subsidizing by the public institutions in France (OPCO);

**Each delegate receives a training convention after enrolment.
